**July 27, 2001 For Immediate Release**

### **SCADA System for Small Hydro Power**

Powerbase Automation Systems Inc., designers and manufacturers of low cost control and protection systems for small hydro power plants (200Kw- 20Mw), will soon introduce its PRO SCADA (Supervisory Control And Data Acquisition) software. Features include station access via the Internet or through Dialup, graphing of historical information, real time operation, multi station access and more. Powerbase offers complete water to wire packages for SHP plants with features of much larger systems in an optimized design for a fraction of the cost. Powerbase is seeking interested parties to integrate the Powerbase Platform with their own product line (generator, turbine manufacturers, etc.). For more information visit [www.powerbase.com](http://www.powerbase.com) or e-mail at [ygrandmaitre@powerbase.com](mailto:ygrandmaitre@powerbase.com).
